

# RingCentral mobile app

Powerful mobile phone system—with HD voice, fax, text, audio conferencing, online meetings, and team collaboration.

The RingCentral mobile app empowers you and your employees with easy and convenient integrated communications—anytime, anywhere. Now it's easy to connect and collaborate with HD voice, fax, text, global conferencing, and online meetings.<sup>1</sup>

The app supports your bring your own device (BYOD) initiative and empowers you and your employees with solutions such as company directory and single business identity for voice, text, and fax. All this while reducing your costs on devices, safeguarding your business data, and improving employee productivity.

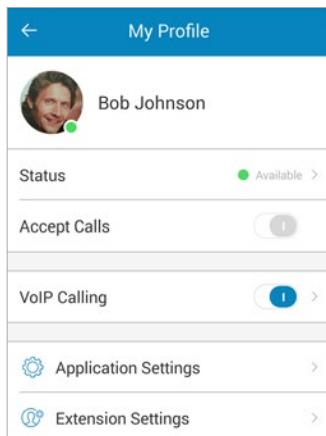

Use the app to make and receive calls on iPhone®, iPad®, and Android™ devices with your RingCentral business number. Send and receive text messages and faxes, review and forward voicemail messages, and get notifications of voice and fax activity.

## Features and benefits

- Call, text, and fax by using your RingCentral business number as your caller ID.
- Make and receive HD calls with clearer sound quality. Secure voice safeguards your business communications.<sup>2</sup>
- View colleagues' real-time phone presence status across devices, and contact them with a quick chat or call.
- Listen to voice message or read the text transcription,<sup>3</sup> reply with a call or text, delete messages or block the number with one click.
- Send a fax with attachments from local or cloud storage (Box and Dropbox).
- Use automatic call hand-off between Wi-Fi and data networks without disrupting any calls.
- Host or attend online meetings; invite up to 50 participants per meeting.<sup>1</sup>
- Easily share presentations and files from Box and Dropbox™ during a web meeting.<sup>1</sup>
- Take advantage of advanced call control including call flip, call transfer, park, call park, and recordings.
- Add or remove callers anytime with easy multi-way calling up to six callers.
- Set up and start conference calls with one tap—anytime, anywhere—with international dial-in.<sup>1</sup>
- View upcoming calendar events. Simply tap to join a video conference or dial in to an audio call.
- Send and receive Business SMS<sup>4</sup> text messages to any number or contact.
- Use your Apple Watch® to pair with your iPhone. Get instant notifications and respond right from your wrist.
- Get push notifications when you receive messages. Interactive notification allows you to respond when a message arrives.
- Get a dashboard view of historical call summary, group and user activities.
- View call time, date, and duration, and return calls directly from your RingCentral call logs.
- Manage your phone system: greetings, call screening, call forwarding, and call handling.

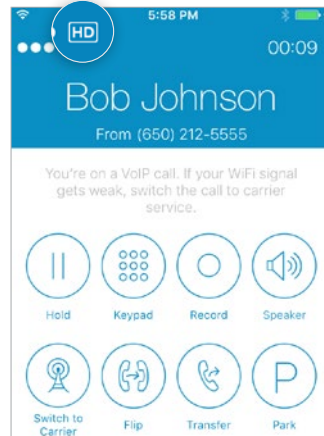

# How it works

With the RingCentral mobile app you have the convenience and power of your entire business phone solution in the palm of your hand. Easily navigate the interface to take calls, check messages, start conference calls, send Business SMS or text messages, adjust settings, and more—from anywhere.

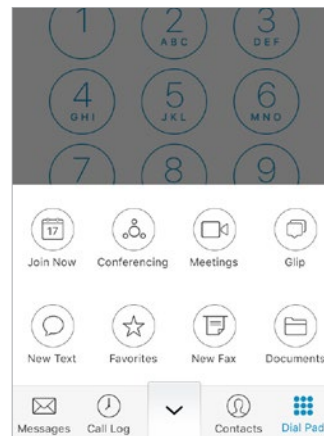

## Phone system management

Manage your extension settings and company phone system—call management with Auto-Receptionist, department and user settings, and phones.

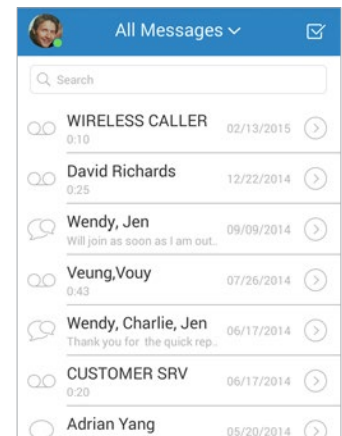

## Secure VoIP with HD quality

Make and receive calls with secure HD voice<sup>2</sup> communications. Easily transfer, flip, park, or record a call.

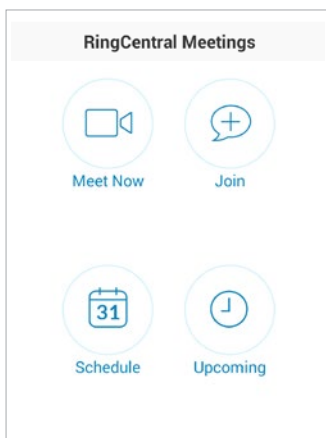

## Inclusive communications

Easily send a text or fax, start an audio conference or online meeting, or collaborate team projects with RingCentral Glip.

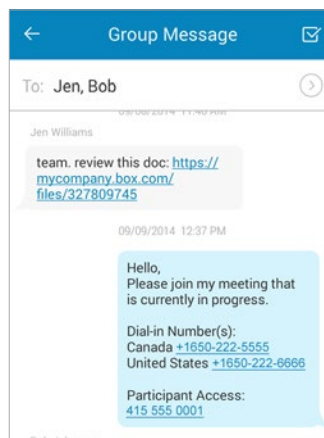

## Message overview

Easily check voicemail, view faxes, or exchange SMS text messages.

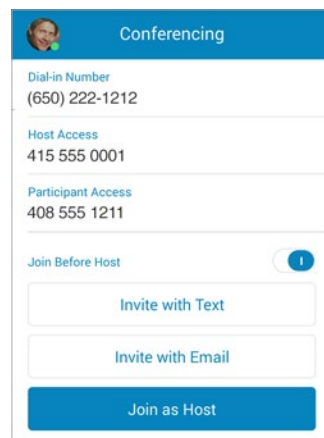

## Online meetings<sup>1</sup>

Instantly start or schedule video meetings. Connect and collaborate with anyone, using screen sharing, chat, mark-up and drawing tools.

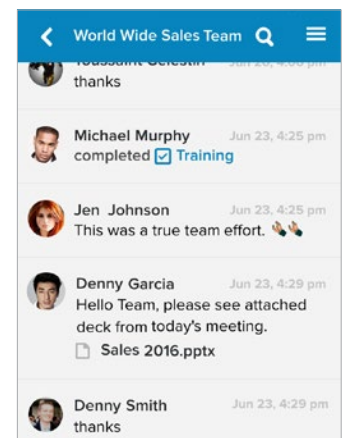

## Business SMS<sup>1</sup>

Send and receive unlimited Business SMS and text messages to multiple recipients from your RingCentral app. Just one tap allows you to join a conference, make a call, or view a website.

## Conferencing<sup>1</sup>

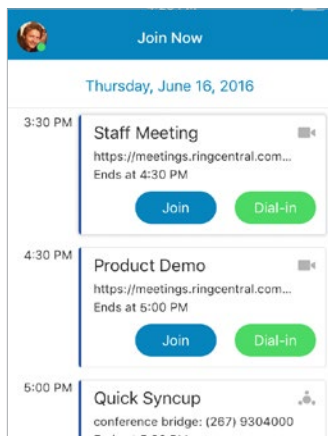

Host unlimited conference calls with up to 1,000 attendees. Easily invite participants with text or email and tap **Join as Host** to start the conference.

## RingCentral Glip

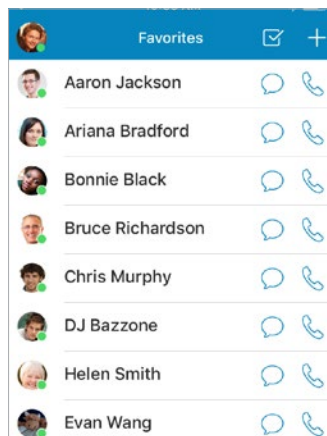

Start your team collaboration with efficient group discussions, file sharing, project management and much more.

## How it works

### Join Now

View upcoming events synced from your calendar. Simply click to dial in to a conference call or join an HD online meeting without entering an access code or meeting ID.

### Favorites

Add your frequently communicated contacts to Favorites. The list automatically syncs across your mobile and desktop apps when you update. Easily click to call or text anywhere, anytime.

### Apple Watch<sup>5</sup>

Get instant notifications of an incoming call and messages. Reply directly with text messages from your wrist. Pair with your iPhone to make/answer calls, listen to voicemail, and view faxes.

<sup>1</sup> RingCentral Meetings, audio conferencing, and Business SMS (text) are available for select Office plans.

<sup>2</sup> Features are available for select Office plans.

<sup>3</sup> Voicemail transcription is available for Office Enterprise plans only.

<sup>4</sup> Text to 911 is available for US Office customers. However, not all 911 service centers have the capabilities to receive text messages yet.

<sup>5</sup> RingCentral service on Apple Watch is available when pairing with Apple iPhone 5 or later models running iOS 9.1 or later.

## Download mobile apps

Download the RingCentral app for iPhone, iPad, and Android devices—the perfect complement to your RingCentral service.
